Governance & risk assessment management

DEFENSE

COBIT framework was used to drive disruptive innovation within organization. COBIT's Evaluate, Direct, and Monitor (EDM) domain played a crucial role in ensuring effective governance of enterprise IT during this transformative journey; facilitating alignment between IT strategy and organizational goals, ensuring effective risk optimization.

The innovation compliance framework enabled balancing innovation with regulatory requirements, ensuring cybersecurity practices' effectiveness while adhering to industry standards.

Risk assessment approach evolved significantly. By incorporating Business Impact Analysis, it was gained a deeper understanding of the potential consequences of cybersecurity risks. This holistic view allowed to prioritize risk mitigation efforts effectively.
