NIS 2 Compliance & OT Assessment

UTILITIES

Supported Enfinity Global in strengthening its cybersecurity posture and aligning with NIS2 requirements through a structured compliance and OT risk assessment program. Delivered a regulatory gap analysis, identifying key non-conformities and defining a tailored remediation roadmap.

Assessed IT/OT segregation, SCADA and RTU configurations, and remote access practices across photovoltaic plants, ensuring alignment with IEC 62443. Developed an OT asset inventory, vulnerability matrix, and reference architecture to guide future security improvements.

The project provided actionable insights for governance, enabling secure operations and regulatory compliance across critical infrastructure assets.
